

VM90 Touch Screen Monitor READ ME FIRST

Thank you very much for purchasing the VM90 touch screen monitor! If you read nothing else, please read the following instructions.

Cable Hookup

Please note that there are two distinct sides to the VGA cable:

- VGA cable connector end marked COMPUTER must be connected to your computer
- the connector end marked MONITOR must be connected to your monitor

The COMPUTER end is the side with a power jack. If not this is not connected properly, your monitor will not power up.

Touch Screen Drivers

Please download the latest touch screen drivers for Windows from:

http://www.short-circuit.com/support/drivers/All_In_One_2k_XP_Vista_Win7_5.0.1.5310_Release.zip

For other drivers, please visit:

<http://www.short-circuit.com/support/files.html>

Display Issues

If there is no display, your computer's resolution may be too high. Please set it to 800x600.
